PREFACE	1
PURPOSE.....	2
INTERAGENCY COUNCIL FOR ADVANCING METEOROLOGICAL SERVICES (ICAMS)	2
FISCAL YEAR (FY) 2022 ICAMS BUDGET CROSSCUT BY AGENCY.....	3

Preface

This year's Budget and Coordination Report (BCR) introduces a streamlined, tabular format: the *FY2022 ICAMS Horizontal Budget Table*, reporting the Federal Meteorological Enterprise's by-agency budget information related to advancing meteorological services and scientific research using an earth systems approach. The table reflects the agencies' "top line" budget numbers for meteorological science and services: FY22 requests along with enacted funding for two previous fiscal years.

This report is the first under the *Interagency Council for Advancing Meteorological Services (ICAMS)*, and satisfies the requirements of Public Law 87-843, Section 304, which calls for an annual cross-agency view of resources applied to meteorological services and supporting research. Where applicable, the table includes amplifying program information.

The BCR was previously produced under the Federal Committee for Meteorological Services and Supporting Research (FCMSSR) and Interdepartmental Committee for Meteorological Services and Supporting Research (ICMSSR), with the support of the Office of the Federal Coordinator for Meteorology. The new ICAMS has evolved to incorporate all the activities and responsibilities of these former organizations. This report has been compiled through the efforts of many agency budget experts and meteorology-related functional experts. As ICAMS continues to strengthen, IMCO will continue efforts to enhance the report's utility by addressing the 2017 Weather Research and Forecasting Innovation Act (PL 115-25, section 402) which calls for the coordination of top forecast needs against budget requests and program initiatives from the participating ICAMS agencies. My sincere thanks to our agency partners for their efforts in preparing this report.

Scott J. Weaver, Ph.D.
Executive Director, Interagency Council for Advancing Meteorological Services
Office of Science and Technology Policy
Executive Office of the President

Purpose

This annual report is prepared for the Office of Management and Budget and the Congress to satisfy the requirements of PL 87-843 section 304, in which Congress directed that OMB prepare an annual horizontal budget for meteorological programs conducted by the Federal agencies.

The budgetary information in this report provides a 'horizontal' look at the meteorological funding requested in the FY2022 President's Budget Request and the funding enacted over the previous two fiscal years. The specifics of the budgetary information requested from the agencies are outlined in an OMB-OSTP coordinated, input guidance document that was provided to the agencies as part of the annual data call.

This report consists of budgetary information compiled in the enclosed budget table: FY2022 ICAMS Horizontal Budget Table.

Interagency Council for Advancing Meteorological Services (ICAMS)

The Interagency Council for Advancing Meteorological Services (ICAMS) is chartered under authority of the Director of the Office of Science and Technology Policy (OSTP) to serve as the Interagency Committee for Advancing Weather Services pursuant to Public Law No. 115-25, title IV, sec. 402 (Apr. 18, 2017), 15 U.S.C. § 8542.

As a continuation of the mandate in Public Law No. 87-843, title III, sec. 304 (Oct. 18, 1962), 68 Stat. 1114, and consistent with Public Law No. 115-25, ICAMS leads the annual development of an interagency budget review of programs supporting meteorological services and supporting research and annual implementation plans.¹

ICAMS is the formal mechanism by which all relevant Federal departments and agencies (Ds/As) coordinate implementation of policy and practices to ensure U.S. global leadership in the meteorological services² enterprise. ICAMS also informs the development of relevant Federal policies via the National Science and Technology Council (NSTC) and within individual Ds/As.

The following set of principles guides the work of ICAMS:

- The meteorological enterprise is a national asset for ensuring personal and community safety, economic success, national security, and education;
- Individuals, and their creativity and dedication, are the greatest asset of the U.S. meteorological enterprise;
- Effective cross-agency coordination and external engagement are critical to success;

¹ DoD will participate to the limits imposed by the Federal Acquisition Regulations.

² Consistent with the World Meteorological Organization, "meteorological services" reflect an Earth system approach and encompass weather, climate, hydrological, ocean, and related environmental services. The term "services" broadly includes all relevant activities that provide value to society whether over land, at sea or in the air, including for the protection of life and property, personal and public health, quality of life, sustainability of the natural world, and economic and national security.

- Success for individuals and organizations is achieved via success of the enterprise as a whole;
- Efficiency is foundational to the stewardship of taxpayer dollars;
- Research, operations, and applications are mutually beneficial, mutually reinforcing, and equally important for realizing ICAMS goals;
- Open debate and a diversity of opinions promote excellence and teamwork; and
- Excellence results in quality and promotes public trust.

The creation of ICAMS enables the following aspirational goal:

The United States will lead the world in meteorological services via an Earth system approach, providing societal benefits with information spanning local weather to global climate.

(The preceding text is an excerpt from the ICAMS charter. The entire charter can be found on the [ICAMS website](#).

Fiscal Year (FY) 2022 ICAMS Budget Crosscut by Agency

ICAMS AGENCY or DEPARTMENT	FY20 Actual (\$0.01M)	FY21 Actual (\$0.01M)	FY22 Request (\$0.01M)
